

Hello!

My name is Sergey, and I am eager to start my career in software testing. While I currently work in a different field, I have been actively studying functional testing for the past four months on the Stepik platform. During this time, I have gained theoretical knowledge and successfully applied it in practice through course assignments. Additionally, I am honing my skills by participating in crowd-testing projects.

Although my hands-on experience in testing is limited, I am passionate about this field and quick to learn new technologies. I consider myself a responsible and detail-oriented person who is not afraid of complex tasks and is always striving for professional growth.

I am looking for an opportunity to tackle interesting challenges and collaborate with experienced software developers who share my passion for quality. I would love the chance to discuss how my skills and enthusiasm can contribute to your team.

I appreciate your time in reviewing my resume, and I would be grateful for the opportunity to connect if my profile aligns with your needs.

Best regards,
Sergey Shapovalov
